

DIE CUTTING & SLITTING SERVICES

Precision Die Cutting & Slitting

At QSPAC Industries, we can slit, rewind, or die-cut a wide variety of tapes to your specifications. QSPAC offers die-cuts on various materials such as foils, foams, films, laminating adhesives and more. We can also slit these materials to produce custom roll widths for manufacturing.

- Avery Dennison Products
- Arlon Foam Tapes
- Kapton Tapes
- Neoprene Foam
- Hook and Loop Strips
- Foil Tapes
- Mylar Tapes
- Transfer Tapes
- Surface Protection Tapes
- Vinyl Tapes
- Foam Tapes and Gaskets
- And much more...

Our custom slitting and rewinding capabilities enable you to have the exact width and length of product specified. We can help improve the efficiency and reduce waste by converting the tape to the exact size required. QSPAC offers single-knife and rewind slitting of pressure sensitive and non-adhesive products, from 1/8" to 60" widths.

QSPAC has the knowledge, technology, and expertise to die-cut a piece of tape into any shape to accomplish exactly what your project requires. You can save on labor costs and product waste. Die-cutting your tape gives you the same shape every time, speeds up production, and reduces errors.

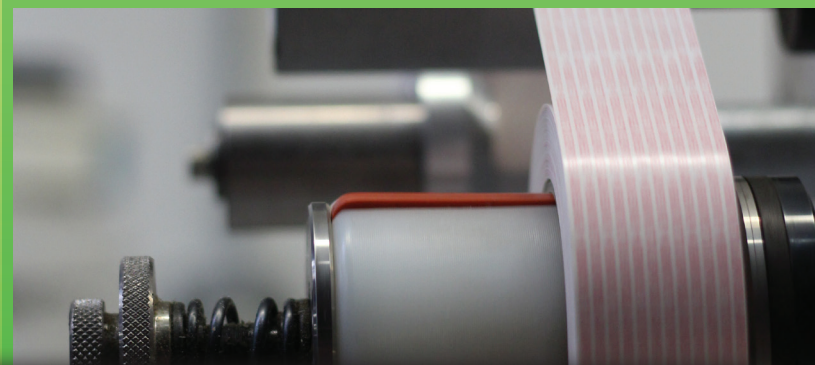

Other Custom Services

Sheeting: Pressure sensitive and non-adhesive products cut in sheet form up to 60" wide.

Laminating: Pressure sensitive adhesive up to 54" wide on a wide variety of extrusions and substrated, in roll form or sheets.

Rewinding: Pressure sensitive tape, rewound to various length rolls, on 1" and 3" cores.
