SPAC

LME918

Uses

Matte Polyester overlaminate used for a variety of wide format print technologies and media. This product is also recommended for other print processes such as screen and offset printing. This product **is not** recommended for floor graphic applications.

Advantages

This product will protect and enhance your printed media, while delivering a lower cost of value, a smaller carbon footprint, and ease of application.

Specifications

Total Thickness 1.8 mil Application Temperature Laminator Processing Range Adjust as necessary based upon print technology and substrate. Laminator Settings Finishing Finishing Finishing Three to Five years outdoors. Storage Conditions Cone year from ship date when stored in proper conditions.	Film	1 mil Matte Polyester
Thickness Application Temperature Laminator Processing Range Adjust as necessary based upon print technology and substrate. After applying the laminate, allow the finished substrate to lay flat for a minimum of 2 hours cure time before cutting, trimming, or rolling. Laminated material should be wound with laminate facing out to alleviate any possible tunneling. Durability Three to Five years outdoors. Storage 50-85°F, 40-80% RH. Conditions Shelf Life One year from ship date when stored in	Adhesive	Optically clear pressure sensitive acrylic.
