RE: PRICE INCREASE ANNOUNCEMENT FOR STRETCH FILM

To Our Valued Distributors,

All major Stretch Film manufacturers have implemented a 10% price increase for the month of March. This increase is due to rising costs in polyethylene resin resulting from the recent escalating tensions in the Middle East.

We at QSPAC are working hard to mitigate the effects of this increase. However, with a second increase already planned by the stretch film manufacturers for April we are forced to implement a **10%** price increase on **all stretch film items** effective **May 4th 2026**.

All orders received before the effective date are subject to inventory availability and past purchase history. All orders must be delivered or will called no later than May 11th 2026. QSPAC reserves the right to apply the new price to orders for which we do not have enough inventory on hand. Should you have any question regarding this increase, please feel free to contact your sales representatives.

We appreciate your understanding and continued support!

Sincerely,
